

Digital Copying From Flat Artwork

S.P. Photographics have developed this as the ideal service for artists requiring high quality images from their flat artwork. Drawings and paintings of virtually any dimensions can be copied using the dedicated facilities located within our fully equipped studio.

Once copied, the reproduction image will then be retouched (if necessary), balanced and colour matched as close as possible to the original. Two high resolution digital images will be supplied on CD from each piece of artwork, a 'Tiff' file which professional printers often require and a 'Jpeg' file for home and web use.
